Brandon Shackelford

I enjoy being at the intersection of design and programming. My focus is to build simple, user-focused, web experiences and I do my best to leave things better than I found it. I'm currently exploring and learning as much as I can about Design Systems, React, Swift, SwiftUI, and GraphQL.

Experience

VSCO
March 2014 — Present

Staff Web Engineer
Currently the tech lead on the Web team working on a multitude of projects spanning all of vsco.co, internal tools, Connect, and more; working closely with designers, PMs, and other engineers. I've also helped develop and maintain coding standards/guidelines as well as a UI component library alongside the Design Systems team.
vsco.co

Bently Enterprises
June 2013 — April 2014

Front End Developer
Led the way on moving Bently's multitude of websites and web apps to be responsive and mobile-first. Built out their first e-commerce presence using Shopify. Also helped lead UX efforts as well as some UI design.
bentlyenterprises.com

Freelance
Feb. 2012 — June 2013

Freelance Web Developer
Worked closely with an assortment of clients to build out custom Wordpress sites. Enabled non-profits to get their web presense up and running. Worked with other developer teams as a web performance consultant.

Arvest Bank
Jan. 2011 — Feb. 2012

Web Developer
Worked as an internal tools specialist developing solutions for bank operations employees creating simpler workflows and enabling them to work more effectively.
